

# Six Satellite Industry Crises

## *Issues, Alternatives and Prospects*

Prepared by TelAstra, Inc., November 2019

### Outline

Introduction: Aspirations and Misconceptions

A. Six Crises; a time of intense difficulty, trouble, or danger-----4

Crisis #1 Overwhelming Terrestrial Transmission Competition

Table 1. Growth Rates for Five Satellite Segments

Figure 1. Revenue for Five Satellite Market Segments

Table 2. Lease Prices for Transmission Throughput

Figure 2. Transmission Line Lease Prices

Fiber Expansion

5G

Crisis #2 Explosive Growth of Satellite Throughput / Capacity-----7

HTS GEO satellites

Figure 3. Transmission Throughput of Communication Satellites

HTS LEO Constellations

Table 9 Summary of Results for Three (LEO) Systems

Crisis #3 Changing Customer Preferences ----- 10

Migration from conventional linear TV to OTT

Figure 4. History of US Satellite Broadcast Television and Radio

Voice telephone to Smart Phones with Internet access

Crisis #4 Fewer GEO Satellite Orders for Construction and Launch-----11

Figure 5. GEO satellite orders in prior 5 years

Figure 6. Number of GEO Operating Satellites 2009 to 2019

Figure 7. Fraction of GEO satellites Operating Beyond End-of-Life

Figure 8. GEO satellite orders by year and by supplier

Figure 9. Ratio of Booked (procured) to launched GEO satellites

Crisis #5 Abundant New Launch Service Providers -----14

Figure 10. Numbers of Launches and Satellites Deployed

Figure 11. Average number of satellites per launch

Crisis #6 Desire for Inexpensive Electronic Satellite-Tracking User Terminals 16

B. Industry Segment Trends and Assessment

1. Fixed Satellite Services-----17

Intelsat

SES

Eutelsat

Telesat

2. Mobile Satellite Services-----18

Figure 12 MSS Revenue History

Inmarsat

Iridium

Globalstar

Orbcomm

3. DBS, DTH Broadcasting-----22

Subscriber Growth	
AT&T DirecTV	
DISH	
4. Satellite Radio Broadcasting-----	23
Sirius XM Satellite Radio	
5. Broadband Satellite Services-----	23
Figure 13. Broadband Subscriber growth	
Echostar HNS	
Viasat	
OneWeb	
SpaceX Starlink	
Telesat LEO	
6. Earth Observation-----	28
7. Internet of Things (IOT) -----	30
8. Radio Navigation Systems-----	31
9. Several New Launch Vehicles-----	32
Figure 14. Annual Launch Failures	
C. Alternatives and Assessment	
1. Supply - Growth of Throughput-----	32
Figure 15. Estimated Future Global Satellite Throughput	
2. Demand - Growth Markets-----	33
In-Flight Internet Access	
Cruise Ship Broadband	
Machine Communications: IOT, B2B	
3. Flexible GEO satellites -----	35
GEO Advantages – Fewer moving parts	
GEO Limitations - Moving Capacity to Hot Spots	
Small GEO Satellite Constellations	
4. HTS LEO Constellations-----	36
LEO Advantages – Shorter transmission time delay	
LEO Limitations – Sophisticated user terminals	
Underestimated Capital Cost Estimates	
Figure 16. Cost Growth for the Big LEO Constellations	
Missing Cost Elements	
High Operating Cost	
5. Government Support, Regulatory, ECA, and Subsidies	39
D. Future Prospects for the Industry-----	40
The Industry is More Rational than it Seems	
GEO Satellites Will Not Disappear	
LEO Constellations Will Not Dominate the Industry	
Flexible Space Segment Designs	
Book to Build Ratios	
Global Regulatory Issues	
Regional Variations in Demand	
Excluded or Constrained Markets	
E. Summary Forecast: Where is the industry headed? -----	43
F. GEO Operating Satellites (Table) -----	45
G. References-----	54
